

12RU 600mm Wide x 600mm Deep Galvanized Steel OUTDOOR Wall Mount Cabinet | IP65 Standard IEC 60529:2013 | Grey

Product Images

Description

Need a robust 12RU outdoor wall mount cabinet to protect your sensitive network equipment? This 600mm wide by 600mm deep galvanised steel cabinet is engineered for harsh environments, providing premium protection from the elements.

Achieve total peace of mind with its certified IP65 rating (IEC 60529:2013), ensuring complete protection against dust and rain. The included rain hood and a high-grade polyurethane door joint strip offer superior weather defence, while the fully welded design guarantees strength and durability.

Security is paramount. This outdoor server rack features a lockable front door secured with a 3-point locking system. All fixtures are internal, deterring unauthorized access. It arrives fully assembled and ready to install, saving you time and effort on site.

Inside, the cabinet offers adjustable 19-inch L-rails at the front and rear, complete with RU markings for easy setup. It supports a static load capacity of 130KG and includes vertical cable management rings and removable rubber-covered cable glands on the base for a tidy, professional installation.

FEATURES
